PROJECTS / OPEN-SOURCE

EMPLOYEE MANAGEMENT SYSTEM Java Spring Boot, MySQL, Hibernate

The Employee Management System is a modern web-based application developed using Spring Boot, which focuses on providing efficient management of employee information within an organization. This project demonstrates the utilization of RESTful web services, a three-layer architecture (Controller, Service, and Repository), MySQL database integration, the Lombok library for code optimization, and Postman for testing REST APIs.

ECOMMERCE PROJECT Java, Spring, MySQL, Hibernate, HTML, CSS, JavaScript, Stripe API, Git.

Developed an e-commerce website for an online clothing store that allows customers to browse through various products and purchase them online. The website includes a responsive front-end built with HTML, CSS, and JavaScript, and a back-end built with Java and Spring framework.

STUDENT MANAGEMENT SYSTEM | Link Java, Spring Boot, HTML, CSS, MySQL

The Student Management System is a web-based application developed using the Spring Framework, specifically leveraging Spring Core Concepts such as Inversion of Control (IoC), Dependency Injection (DI), and Aspect-Oriented Programming (AOP). This application provides a comprehensive solution for managing students' information, courses, and enrollment processes.
